

## CSP JOB SHEET

EGM Grazing Management 2

**ENHANCEMENT: Establish and maintain a herd size throughout the year that is balanced with forage resources such that supplemental feed is required for less than 60 days per year in order to protect soil, water, and plant resources and reduce energy consumption.**

### BENEFITS

(SHORT DESCRIPTION OF ENHANCEMENT BENEFITS)

- This will ensure a properly managed grazing system with animals and forages balanced. Thus resulting in improved forage quality and animal health.

### CRITERIA

**To be eligible for this enhancement payment, fields must meet the following criteria.**

- Animal health – A body condition score of 5 or higher must be maintained, however after calving a BCS of 4 is allowable.
- Forages grazed no lower than 4 inches (introduced cool season); 2-3 inches (warm season introduced); 6 inches natives.
- Grazing plan developed.

### RECORDKEEPING

**In order to verify performance with these criteria, you must complete the following records.**

- Documentation to justify grazing capacity (ex. C-graze; NUTBAL, Grazing Stick, or some other calculation/calculator are possible tools). Feeding reloads shall be kept.
