

## CSP JOB SHEET

ENM-Precision Agriculture  
Techniques

**ENHANCEMENT: Manage use of precision agriculture techniques, including GPS and variable rate application equipment, to facilitate the application of nutrients in accordance with the production potential and plant needs by management zones/grids.**

### BENEFITS

- Reduced potential for fertilizer loss to the environment.
- Improved crop performance.

### CRITERIA

**To be eligible for this enhancement payment, fields must meet the following criteria.**

- Match soil capability and yield potential with amount of fertilizer applied.
- Calibrate automated equipment to match fertilizer application with recorded soil yield potential.
- Soils sampling will be based on grids or crop management zones.

### RECORDKEEPING

**In order to verify performance with these criteria, you must complete the following records.**

**You must produce and maintain records using the Nutrient Management Planning Software standard forms.**

**In addition, GPS application documents must be maintained in the records required in Nutrient Management Standard 590.**
